## 3. Fortray - Palo Alto - Assumption

- ✓ We understand that delegate already understand L2/L3, Routing.
- ✓ The delegate already knows the **“Fortray Networks – Palo Alto Panorama”** physical and logical connection.
- ✓ The delegate already has a basis Troubleshooting skill, such as ping and trace.
- ✓ The delegate already has access to the **“Fortray Networks – Palo Alto Panorama” Spreadsheet encompassing the Basic Layer, 2, 3 and allocated subnet information. For more details refer to the “Student Folder”.**
- ✓ This document is created to show an example for one topology only. The candidate needs to refer to his own topology and follow this step by step guide.
- ✓ We assume that delegate already has installed the VPN software and him/she have VPN user / Password. If any issue, contact our Technical team.
- ✓ Our VPN software is supported by PC, MAC, Android, and IOS devices.
- ✓ It’s also assumed that delegate has access to PC/Laptop i5 with 4GB RAM.
- ✓ For optimal connectivity, we recommend at least 10MB internet connection.
- ✓ We assume that we already have INTERNAL, DMZ, OUTISE interfaces that are already configured.

## 4. Fortray - Palo Alto - Network Topology

The below network topology is just for information purpose only. Please refer to your student folder and your designated topology. If any doubt, please ask your instructor.

## 5. Fortray - Palo Alto - Notes About Task

Here we have Management Access details for Palo Alto firewalls and Panorama Installed in LAB and SNMP Management Server.

Palo Alto Student Firewall Information								
Devcie Name	Role	Model	Version	PA-200 Serial no	MGMT IP	Default Credentials	New User	PASSWORD
FN-PA-PRIM-110	Primary	PA-200	8.1.0	001606067716	10.205.1.110	admin/admin	admin	Palo@123
FN-PA-BACK-111	Backup	PA-200	8.1.0	001606059502	10.205.1.111	admin/admin	admin	Palo@123
FN-Panorama-112	Panorama	VM	9.1.3		10.205.1.112	admin/admin	admin	Palo@123

## 6. Fortray - Palo Alto - Task: Custom Response Page

Fortray Security team needs to block all social networking websites as per company policy and each user will get custom error page.

In this task, we will learn how to configure custom response page.

### Summary of the Configuration Steps:

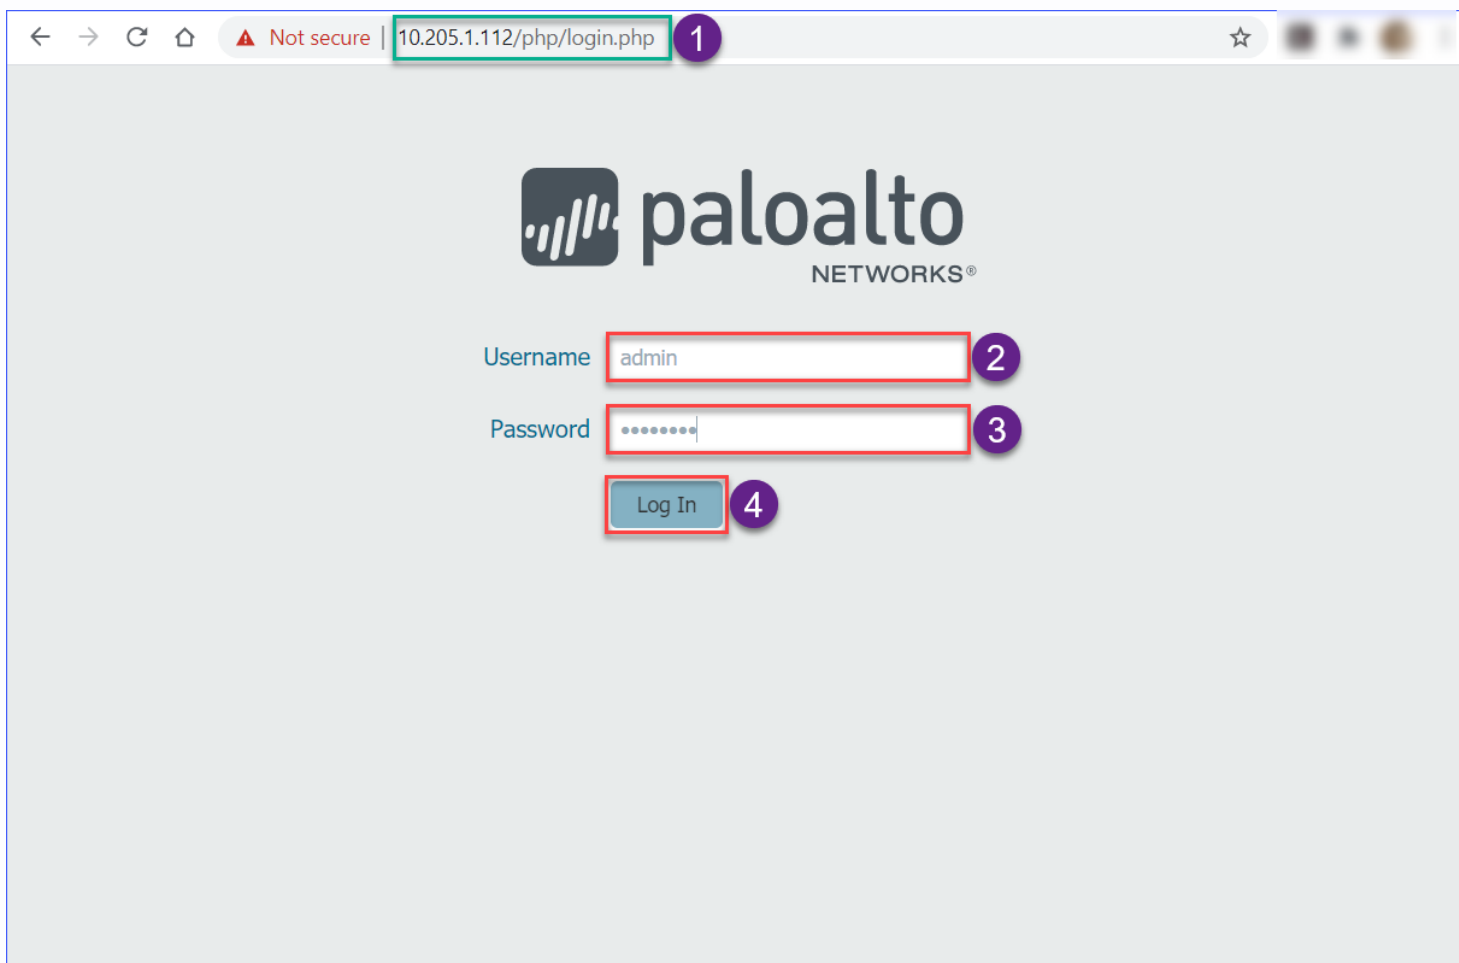

- Login to Palo Alto Panorama using Web GUI
- Configuring Custom Response Page
- Verification

## 7. Fortray - Palo Alto - Configuration: Custom Response Page

In this section, we will configure custom response page.

### 7.1. Step 1: Login to Palo Alto Panorama using Web GUI

Type Palo Alto Panorama's address <https://10.205.1.112> in web browser and hit enter to continue. Enter username / password to login.

## 7.2. Step 2: Configuring Custom Response Page

To configure Custom Response Page, we need to follow these steps:

1. Click on **Device**
2. Click on **HO-NET-INT**
3. Click on **Response Pages**
4. Click on Link to Change Response Page
5. Click on **Import**
6. Click **Browse** and select html file to upload
7. Click **OK** to Import Response Page

The screenshot shows the Palo Alto Networks GUI. The navigation pane on the left has 'Response Pages' highlighted with a red box and a purple circle '3'. The main content area shows a table of response pages, with 'URL Filtering and Category Match Block Page' highlighted with a red box and a purple circle '4'. A modal dialog titled 'URL Filtering And Category Match Block Page' is open, showing an 'Import File' section with a text box containing 'C:\fakepath\url-block-page.txt' and a 'Browse...' button highlighted with a red box and a purple circle '6'. Below this, there is an 'Import' button highlighted with a red box and a purple circle '5', and an 'OK' button highlighted with a red box and a purple circle '7'. The top navigation bar has the 'Device' tab highlighted with a red box and a purple circle '1'. The template dropdown menu shows 'HO-NET-ZONE-INT' highlighted with a red box and a purple circle '2'.

## 7.3. Step 3: Committing to Panorama and Pushing to Devices

To apply all changes, commit to Panorama and Push to Devices.

The screenshot displays the Palo Alto Networks Panorama web interface. The top navigation bar includes 'Dashboard', 'ACC', 'Monitor', 'Policies', 'Objects', 'Network', 'Device', and 'Panorama'. The 'Panorama' tab is active, showing a list of configuration objects. A modal dialog box titled 'Commit to Panorama' is open in the center. The dialog contains the following elements:

- Title:** Commit to Panorama
- Message:** Doing a commit will overwrite the Panorama running configuration with the commit scope.
- Options:**  Commit All Changes,  Commit Changes Made By:(1) admin
- Table:** A table with two columns: 'Commit Scope' and 'Location Type'. The first row shows 'HO-NET-ZONE-INT' under 'Commit Scope' and 'Templates' under 'Location Type'.
- Buttons:** 'Preview Changes', 'Change Summary', 'Validate Commit', and 'Group By Location Type' (checked).
- Input:** A text field labeled 'Enter a description'.
- Bottom Buttons:** 'Commit' (highlighted with a red box and a '2' callout) and 'Cancel'.

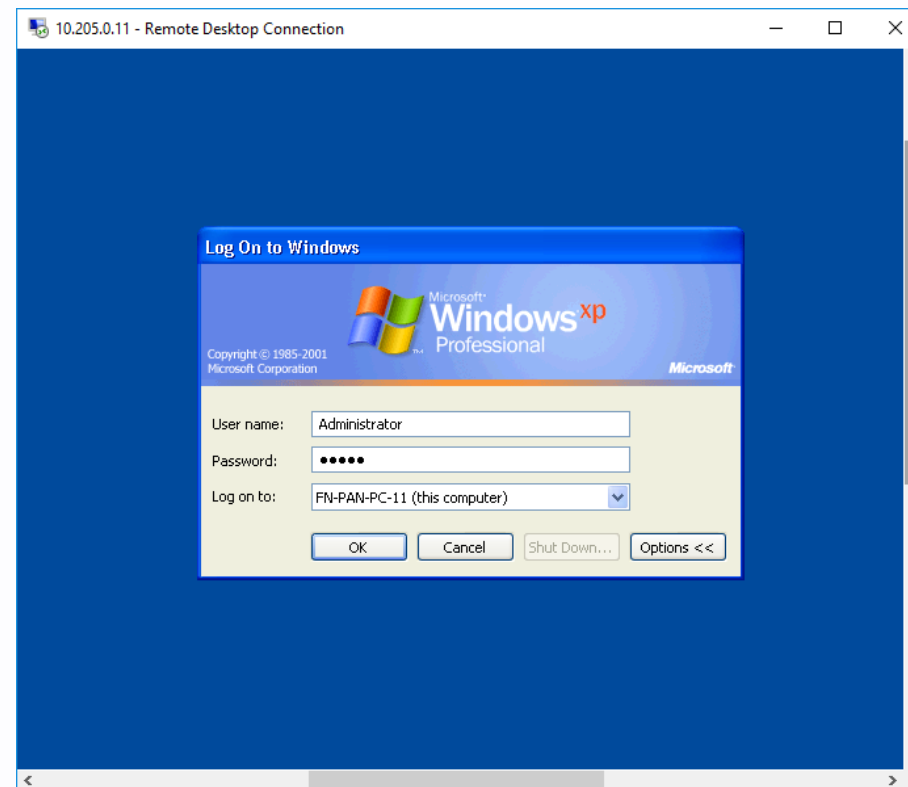

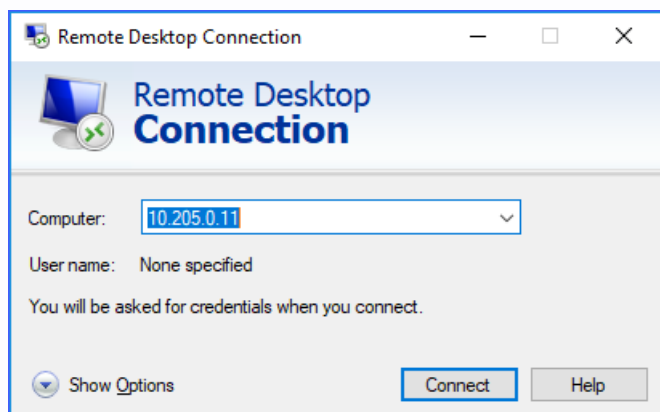

A '1' callout points to the 'Commit' button in the top right corner of the main interface. The status bar at the bottom shows the URL 'https://10.205.1.112/?#', the time 'Time: 08/22/2020 13:05:08', and icons for 'Tasks' and 'Language'.

## 8. Fortray - Palo Alto - Verification

In this section, we will verify the created NAT Policy.

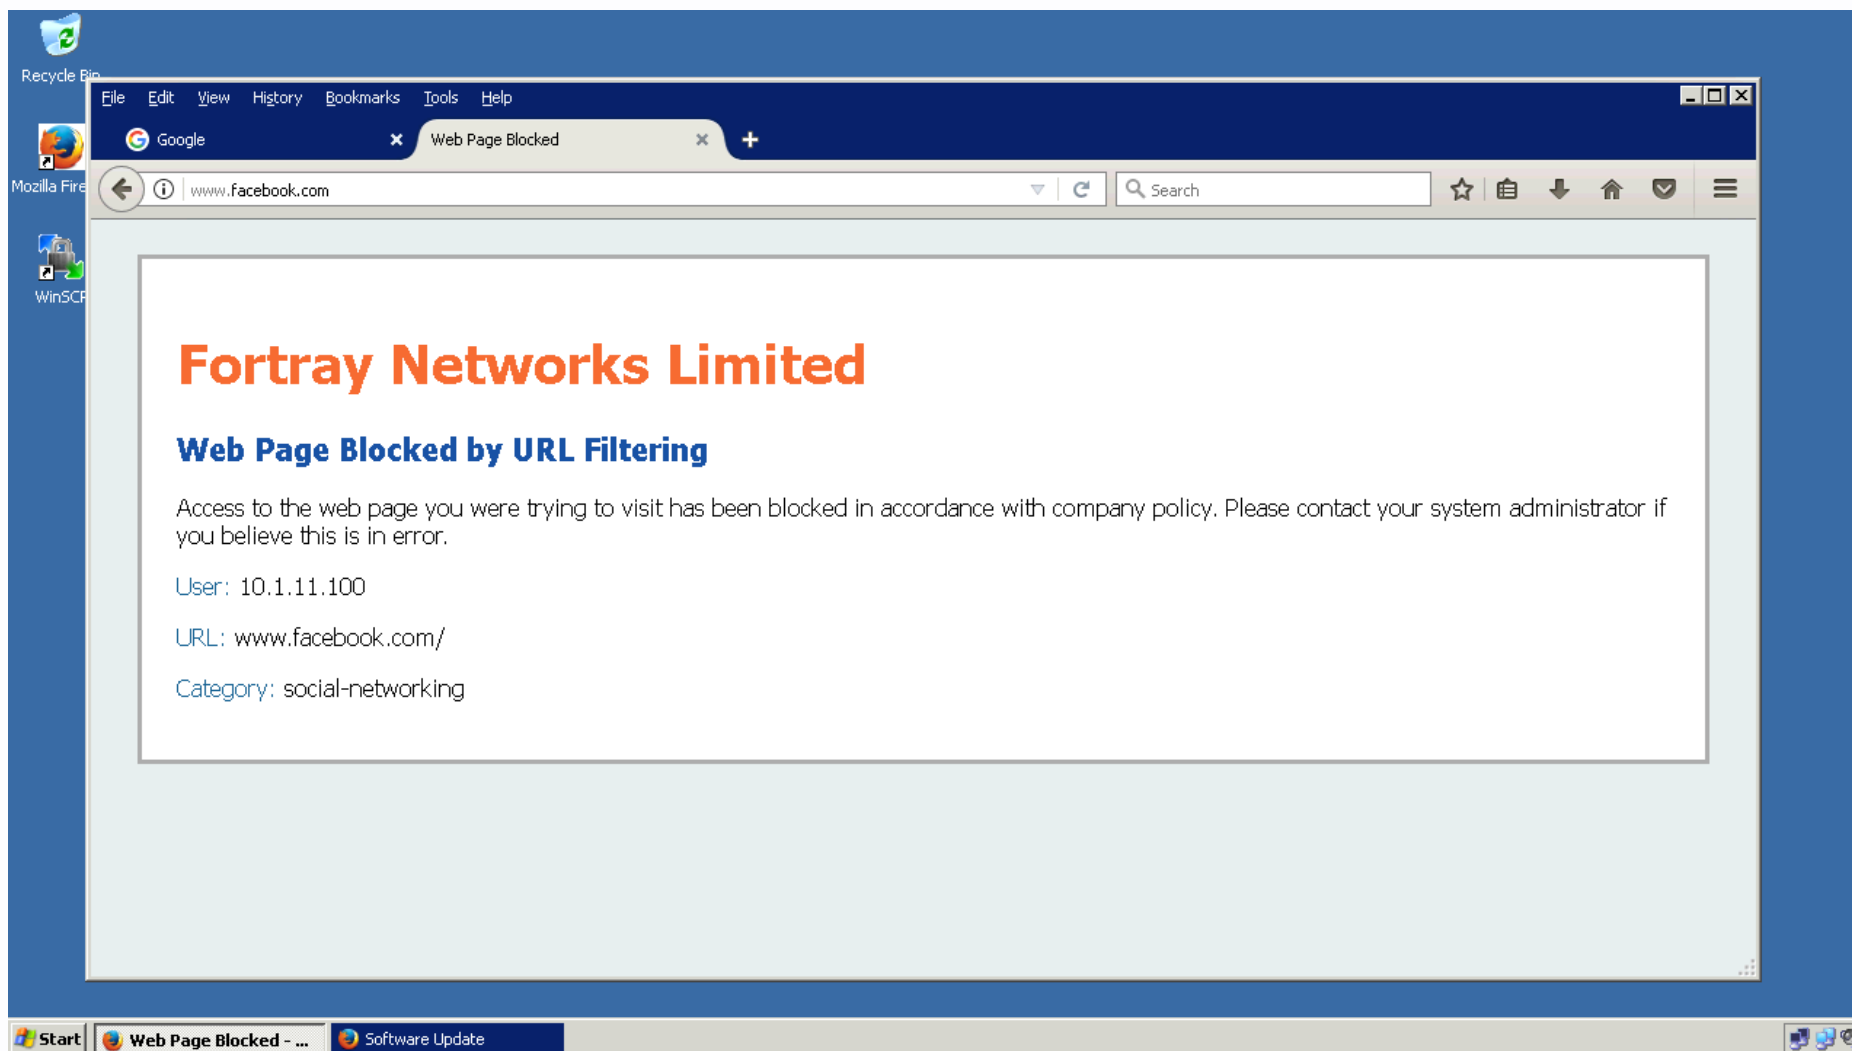

### 8.1. Step 1: Login to TEST PC

Login to Test PC Using RDP Client. Refer to spreadsheet for Test PC MGMT IP Address.

## 8.2. Step 2: Verification Using Web Browser

Try to open some website, this will not display any page.

Thanks, and Good Luck
